

Acoustic Fence Blankets

We manufacture two types of acoustic fence blankets to suit all outside noise problems. Both types of Blankets are flexible, durable and waterproof and can be hung from fixed or portable fence panels and used as a permanent or temporary solution to a noise problem.

The blankets have a rip proof outer cover of PVC Coated polyester at 900g per square metre making them the toughest most durable blankets on the market.

The acoustic blankets are supplied as modular units and can cover any size of aperture or area by co-joining with industrial Velcro machine stitched into the sides enabling many curtains to join together to form a singular unit creating a high performance acoustic noise barrier.

The blankets primary use is to screen off nuisance noise creating an effective barrier between the noise source and the receiver.

PB1 Lightweight Fence Blanket

These blankets are ideal for construction sites when a portable solution is required. The lightweight noise absorbing blanket is supplied wrapped and folded and is easy to handle and quick to install over fencing or scaffolding. It contains a 40mm thick internal noise absorbant pad with a durable waterproof and rip proof PVC outer cover. They are available in a selection of four standard colours directly from stock, with fifty other colours available subject to minimum order quantities. We also have our own in house printing facility and can offer a bespoke printing service, why not include your company logo and your own corporate branding! The blankets are a high performance product tested in an independant laboratory, at 600Hz they will absorb 100% of the noise. They come with eyelets along the top and down the sides for hanging and attaching to the fence panels and velcro along the edges for co-joining.

SC7P High Density Fence Blanket

These blankets are used to treat very high levels of noise. They are a heavier product to handle and contain a high mass acoustic membrane backed with a quilted acoustic pad either side and wrapped with our durable waterproof and rip proof PVC outer cover. They are designed to be attached to fencing, scaffolding or any suitable structure. They are available in a selection of four standard colours directly from stock, with fifty other colours available subject to minimum order quantities. We also have our own in house printing facility and can offer a bespoke printing service, why not include your company logo and your own corporate branding! The blankets are a high performance product tested in an independant laboratory, they will achieve a 32dB noise reduction at 1250Hz. They come with eyelets along the top and down the sides for hanging and attaching to the fence panels and velcro along the edges for co-joining.

Availability

Acoustic Fence Blankets are available to buy online directly from our website in our standard sizes of 2.0 x 1.2mt and 2.5 x 1.2mt. They are supplied as modular units and are designed to be co-joined so any size of acoustic barrier can be achieved. If however you require a different size, please contact our sales office who will be happy to assist.

The Acoustic Blankets have been developed by our consultants, and are fully tested by independent laboratories. As the original manufacturer of Acoustic Blankets we have been supplying them for over 20 years from our factory in Leicestershire.
